PROFESSIONAL SUMMARY

AWS Network Deployment Technician and Computer Science student with hands-on data center experience in hardware diagnostics, network troubleshooting, ticket resolution, and component replacement. Linux skills developed through independent study and hands-on labs; Python automation projects supporting infrastructure tracking and technician coordination.

TECHNICAL SKILLS

Linux / OS support: Ubuntu, SSH, command-line troubleshooting, logs, services, processes, permissions, pipes and redirection, storage/partitioning, VirtualBox, Hyper-V, Docker.

Hardware / networking: Server connectivity and hardware diagnostics, switches, optical transceivers, component replacement, MPO/LC fiber, patch panels, TCP/IP; conceptual knowledge of HTTP, DNS, DHCP, and RAID.

Programming / tools: Python, shell scripting fundamentals, SQL, JavaScript, REST API integrations, PuTTY, serial console access, internal ticketing and monitoring tools.

Operations: Infrastructure deployment and validation, technical documentation, process improvement, cross-team coordination. **Training:** CCNA in progress; OSHA 30.

PROFESSIONAL EXPERIENCE

Network Deployment Technician | Amazon Web Services | Lithia Springs, GA | March 2026 - Present

- Deploy, cable, validate, and troubleshoot network infrastructure in large-scale AWS data centers; audit connectivity, labeling, and deployment accuracy.
- Diagnose hardware and connectivity faults across servers, switches, fiber cabling, patch panels, and optical transceivers; replace failed components and verify restored connectivity.
- Resolve server handoff tickets using internal monitoring tools to isolate faults across both ends of physical connections; traced degraded MPO optical levels to a failed optic and verified 100% port connectivity after replacement.
- Access switches through serial console connections using PuTTY and execute CLI commands for troubleshooting and reset procedures.

Draftsman/Designer | SCB Construction Group | Covington, GA | March 2022 - March 2026

- Produced accurate AutoCAD documentation and revisions; collaborated with engineers, project managers, and field teams to resolve technical discrepancies.
- Supported internal IT operations by troubleshooting workstation, software, and workflow issues.

Owner/Technician | Dave's Mobile Radio Solutions | Covington, GA | July 2021 - March 2022

- Diagnosed electrical, hardware, and connectivity faults in radios, cameras, and vehicle electronics; installed equipment and replaced failed components.

TECHNICAL PROJECTS & INDEPENDENT STUDY

Linux Administration and Troubleshooting | Ubuntu, SSH, VirtualBox, Hyper-V, Docker

- Practice Linux OS management and troubleshooting in virtual machines, including logs, services, processes, permissions, networking, and storage; configure SSH access and run Docker.

AWS Cabling Tracker - Bulk Updater | Python, OCR, Asana API

- Built automation to convert handwritten cabling records into structured infrastructure tracking updates; reduced repetitive data entry by approximately 40% during internal workflow testing.

Patch Panel Audit Visualizer | JavaScript, Tampermonkey

- Built a tool that converts infrastructure port mappings into a physical patch-panel layout to simplify audits and reduce manual cross-referencing.

AWS Onsite Coordination Tool | Python, Slack API

- Built a technician site check-in workflow and automated operational summaries to support onsite coordination.

EDUCATION

Bachelor of Science in Computer Science - In Progress

Kennesaw State University | August 2022 - Present | Expected graduation: 2027
